Professional Summary

Computer Science graduate with hands-on experience in Python, RESTful APIs, backend development, databases, and application troubleshooting. Experienced in developing and debugging full-stack applications using Python, JavaScript, Node.js, Express.js, React.js, and MongoDB. Familiar with API testing, root-cause analysis, application debugging, SQL, Git/GitHub, AWS services, and software development practices. Strong problem-solving and analytical skills with an interest in application support, system reliability, automation, and Generative AI.

Technical Skills

- **Programming:** Python, JavaScript (ES6+), Object-Oriented Programming, Data Structures & Algorithms
- **JavaScript & Node.js:** Asynchronous Programming, Promises, Async/Await, Event Loop, Node.js, Express.js
- **Backend & APIs:** RESTful APIs, API Development & Integration, CRUD Operations, JWT Authentication, Role-Based Access Control
- **Databases:** SQL, MySQL, MongoDB, Joins, Aggregations, Schema Design
- **Web Development:** HTML5, CSS3, React.js, Bootstrap, Responsive Web Design
- **Problem-Solving & Debugging:** Application Troubleshooting, Debugging, Root-Cause Analysis, API Testing, Functional & Integration Testing
- **Cloud & DevOps:** Git, GitHub, CI/CD Concepts, Docker, AWS (EC2, S3, IAM, VPC, CloudWatch), Microsoft Azure (Familiarity)
- **Software Engineering Practices:** SDLC, Agile/Scrum, Documentation, Version Control
- **Core Strengths:** Problem-Solving, Analytical Thinking, Communication, Team Collaboration, Adaptability

Education

Bachelor of Technology (B.Tech) — Computer Science and Engineering 2022 – 2026
Ideal Institute of Technology, Kakinada, Andhra Pradesh

Intermediate — MPC 2020 – 2022
Sri Chaitanya, Kakinada, Andhra Pradesh

High School — 10th 2019 – 2020
Aditya School, Kakinada, Andhra Pradesh

Internship Experience

Full Stack MERN Developer (Virtual Internship) | *SmartBridge* 2025

- Developed full-stack web applications using React.js, Node.js, and Express.js, integrating frontend interfaces with backend services.
- Built RESTful APIs and CRUD operations using Node.js and Express.js with MongoDB for structured data management.
- Implemented authentication and API integration while working with backend services and database operations.
- Used Git/GitHub for version control, including branching, merging, and collaborative development.

Projects

Lavogue — Full Stack E-Commerce Platform — Live Project
Tech Stack: MongoDB, Express.js, React.js, Node.js, JWT, REST APIs

- Developed a full-stack e-commerce platform using Node.js, Express.js, React.js, and MongoDB, implementing product, cart, order, and user management workflows.
- Designed and integrated RESTful APIs for CRUD operations and frontend-backend communication, enabling dynamic product and order data management.
- Implemented JWT-based authentication and role-based access control for secure user access, with database-backed management workflows for products, categories, images, banners, and promotional content.
- Integrated backend services with the React frontend using REST APIs and managed application data through MongoDB.

Freelance Finder — Full Stack Web Application — GitHub
Tech Stack: MongoDB, Express.js, React.js, Node.js, JWT

- Developed a full-stack freelance marketplace supporting project posting, freelancer bidding, proposal management, project assignment, and submission workflows.
- Designed RESTful backend APIs using Node.js and Express.js with MongoDB for managing users, projects, proposals, and application data.
- Integrated real-time bidirectional communication using Socket.io, enabling instant client-freelancer messaging within project workflows.
- Implemented JWT authentication and role-based access control to manage separate client and freelancer permissions securely.

Certifications

- Full Stack Development – SmartBridge
- JavaScript Essentials – Cisco Networking Academy
